

Wet Blanket Leadership

How to Extinguish the fire-that burns within

July 17, 2013
2:15 PM

Phyllis M. Hodges, SNS, MPS
Director of LEA/SFA Support
Tennessee Department of Education
School Nutrition Program

- Learning Objectives
 - Discuss Sources of Fire
 - Learn to Build a Fire
 - Learn to Keep a Fire Going
 - Learn how to avoid and combat Wet Blanket Leadership

Let's Learn Together

- Flames
- Heat
- Strength
- Purpose
-

What do you see in a Fire?

- External
 - Co-Workers
 - Customers
 - Friends
 - Public
- Internal
 - Books
 - Training opportunities
 - Reflections

Where do we find sources for our fires?

- Don't fight a fire not worth fighting.

Fires are DANGEROUS

- Smother it in its initial stages

The BEST Way to Put out a Fire

- Remove the SOURCE
- Smother with a BLANKET
- Smother with a WET BLANKET
- Use BAKING SODA

PUT THAT FIRE OUT

- Add WATER
- Use a FIRE EXTINGUISHER
- Call 911

PUT THAT FIRE OUT

- What stage is your FIRE in?
- Continuing Sources of FUEL?
- Controlling the Source of FUEL
- WET BLANKETS

**Don't let THEM Put the Fire
OUT**

- A spray bottle of water?
- A few sprinkles
- A hard rain?
- A downpour?
- A Hurricane?

Can these be Wet Blankets?

- Look in the Woods
- Stockpile
- Start strong and stay strong
- Find new fuel
- BREATHE
- Avoid the WET BLANKETS

**How can YOU keep your fire
BURNING?**

- Baking Soda
- Avoid water hydrants
- Disarm Fire Extinguishers
- Get to know 911

**How can YOU keep your fire
BURNING?**

- Leaders have to find the sources of fuel
- Leaders have to continually stoke the fire
- Leaders have to understand the strength of fire
- Leaders have to use baking soda wisely
- Leaders have to combat the wet blankets
- Leaders have to disarm the fire extinguishers
- Leaders have to know 911

What does that mean for Leadership?

- WHAT can YOU do to start a FIRE?
- What can YOU do to put one out?
- Which direction do you want to go?

How CAN WE use our FIRE?
